Too many cooks in this kitchen. 😊

Rose is working this.....please wait until you hear from her.

Sujatha,

Did you speak with Sandra recently? Sandra had sent an e:mail a couple of hours ago expanding what she would like EFED to discuss.

Jean

Jean

I already did.

Hi Rose,

Do you want me to send a note to Sandra reiterating that Kris plans on very briefly (a couple of minutes) discussing neonic seed treatment pollinator risk assessments and not address any of the other items or do you want to respond to Sandra. Alternatively I can set up a quick TEAMS meeting with Sandra to make sure that we are all on the same page.

Jean

Hi Sujatha – I hope you're well! Thanks very much for the update. Thanks also to Kris for being available and to Jean for coordinating.

A great afternoon to all,

Sandra O'Neill

Sandra

Kris Garber will be available to discuss the neonic seed treatment pollinator risk assessment at the SFIREG meeting next week. Thank you.

Hi Sujatha,

This is the topic I raised at the management meeting this meeting. EFED needs someone to be available to talk for about a couple of minutes about neonic seed treatment pollinator risk assessment, last item on the agenda below. Justin spoke with Keith and unfortunately he is on leave next Tuesday. Would Kris be available. If so, could you send a note to Sandra to let her know. If not please let me know and I will ask Tom.

Thanks

Jean

Sandra

Following through on today's meeting and with respect to the questions posted in the invite, the last question could be addressed by EFED (provided EFED management agrees). The last sentence though

(highlighted in yellow) also pertains to EFED with respect to evaluating potential risks to pollinators from neonicotinoid-treated seed. EFED management would have to identify the appropriate staff member.

Tom Steeger

When: Tuesday, June 1, 2021 12:00 PM-1:00 PM (UTC-05:00) Eastern Time (US & Canada).

Where: Microsoft Teams Meeting

Greetings all,

The purpose of this meeting is to prepare for the Neonicotinoid Treated Seed Issues session at the Full SFIREG June 8 meeting. SFIREG's questions for this session are below. We want to make sure we have the right group of people to weigh in on the questions. Please feel free to forward to any that should be included.

SFIREG Questions for EPA:

- These neonicotinoid treated seeds are exempt from FIFRA regulations per 40 CFR 152.25(a) Treated Articles or Substances; what will it take to see the treated article determination changed?
- When does EPA anticipate finalizing the answers to the coated seed petition?
- How is this situation similar/different from regulating persistence as we have seen in grass clippings, mulch, manure, etc...?
- Are we again looking to regulate beyond the user?
- With changes/improvements in seed coating technology is there an increase in residual presence?
- If so, is this being considered by EPA?
- Were/are the seed treatment associations in contact with EPA?
- Regardless of whether they are considered treated articles under FIFRA, are treated seeds regulated under the Federal Seed Act?
- Does the EPA's risk assessments for pesticides used to treat seeds evaluate the potential risks from exposures to the pesticides from the plant or vegetation that grows from the seeds. If not, would EPA consider an evaluation of these potential risks, as they do for runoff, dusting, and consumption of unsown seed? With respect to ecological risk and pending EFED management input, EFED could provide a response.

If possible, having EPA provide a review of the process for the neonicotinoids approved for treating seeds from OPP-EFED as it relates to environmental exposure and pollinators would be beneficial.

Thanks and please let me know if you have any questions.

Best,

Sandra O'Neill
